

ENERGY POLICY

ATUSA Empresarial, S.L.U., a leading manufacturer of malleable iron pipe fittings and other products for the construction, electrical and plumbing sectors, is committed to the continual improvement of its energy performance in order to manage and reduce its energy consumption while minimising its environmental impact.

This Energy Policy provides the framework for the Energy Management System (EnMS) and reflects the organisation's commitment to its implementation, maintenance and continual improvement, in accordance with ISO 50001.

The organisation is committed to the following:

- Continually improve its energy performance by promoting the efficient use of energy and giving particular attention to Significant Energy Uses (SEUs).
- Ensure compliance with applicable energy legislation and other requirements related to energy performance, energy use and consumption.
- Establish and periodically review energy objectives and targets aimed at continual improvement and energy efficiency.
- Provide the necessary information and resources to achieve the established objectives and ensure effective operation of the Energy Management System.
- Promote the procurement of energy-efficient products and services and incorporate energy performance considerations into the design and improvement of facilities, processes and equipment, where technically and economically feasible.
- Promote the involvement of people working for or on behalf of the organisation through communication, awareness and participation in the responsible use of energy

This Energy Policy shall be communicated to all persons working for or on behalf of the organisation and shall be made available to interested parties upon request.
